

ROSI

RECORD ONCE SHARE INSIGHT

NEW ADVANCE CARE PLAN SOLUTION

WHY

We know people are more likely to die in their place of choice and they and their family will have better experiences when:

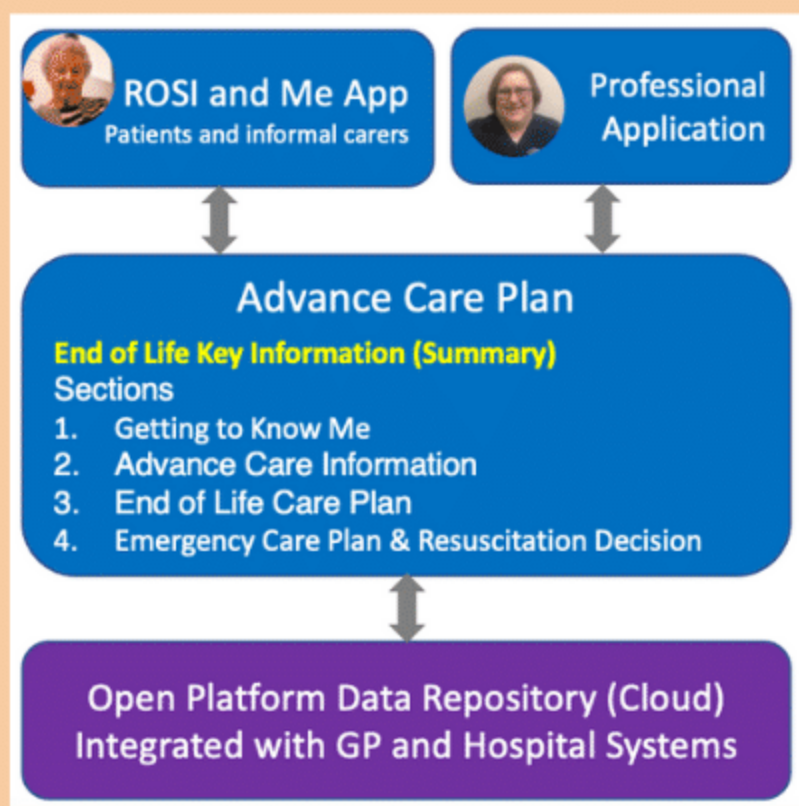

- Their wishes are discussed
- Wishes are recorded and shared with all the professionals involved in their care
- Records can be easily updated.

DEVELOPMENT

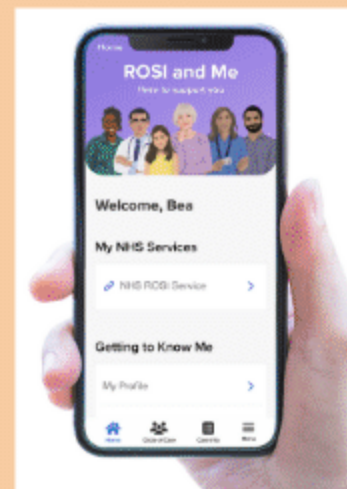

- 70 + clinicians
- 37 hours of coproduction workshops
- 30+ patients and informal carers
- 4 suppliers
- 5 voluntary / patient engagement & support agencies

An electronic record that is accessible by authorised users from any device with a Patient App.

THE SOLUTION

ROSI AND ME APP

- People, their informal carers or proxies can see their Advance Care Plan.
- People / carers can edit 'Getting to Know Me' with information which is important to them and forms part of their clinical record.

OUTCOMES

- Innovative solution, with in context link in SystemOne
- Replaces My Care Wishes, includes CPR decision in line with ReSPECT
- Similar system is being implemented across London.
- Accessed by authorised users, from whatever systems they use, with ability to view, create and edit as defined by their role.
- Printed version of DNACPR in home.

1. Patients and families have good EOL experiences
2. Easily accessed, relevant, up to date information for practitioners
3. Coordinated collaborative person centred care & decision making.

TEST IN BURY TOWN AREA

Patients on Palliative Care Register with GP practices:
Guildhall & Barrow, Victoria
Mount Farm, Angel Hill, Swan

14 Care Homes
West Suffolk Hospital & Community Healthcare
St Nicholas Hospice Care
GP Federation Out of Hours Service & GP Plus
NHS 111 and Clinical Assessment Service

Project Team

Dr Roland Appel - Project Lead
Dr Barbara Gale - EOL Clinical Expert
Cara Twinch - Transformation Lead
Brigid Murphy - Project Support
