# My Care Plan: Elastomeric Pumps

## Outpatient Parenteral Antimicrobial Therapy (OPAT) service

Your consultant now considers that your on-going care can be managed in the community or in your home. Our team will work with you, with your Consultant, GP and the community services to provide your continuing treatment and on-going support in the community.

Name .....

NHS number .....

Relationships

Type	Name and contact	Comment
GP		Contact your GP first if any unrelated health issues arise.
EIT		
Contact Community Nurses via the CCC: (Care Co-ordination Centre): 0300 123 2425 If a community nurse is supporting your elastomeric pump administration they will try to keep to the same time each day. However this cannot be guaranteed , so you should remain at home until you have had your antibiotic treatment that day.
